sinus surgery, contact your physician prior to irrigation. If you experience any pressure in the ears or burning in the nasal passages, stop irrigation and get further directions from your physician. Keep out of reach of TEENren. Read and retain this enclosed brochure for instructions and other important information. Microwave disinfection: Assessing the risks of irrigation bottle and fluid contamination. It has shown promising results in that complete bacterial disinfection was achieved in the witnessed clinic setting, indicating the lack of patient's compliance to follow instructions when they are unsupervised. 17 The principal aim of this study was to assess the effectiveness of microwave disinfection of in vitro contaminated NeilMed? Sinus Rinse TM bottles to inform on the optimum microwave duration that would achieve the highest degree of decontamination. A. Nettoyez toujours vos voies nasales avec les solutions préparées à l'aide du contenu des sachets SINUS RINSEMC de NeilMed uniquement. Nos sachets contiennent une préparation à base de chlorure de sodium et de bicarbonate de sodium de qualité USP. Ces ingrédients sont les plus purs que l'on puisse trouver sur le marché pour fabriquer le mélange de poudre sèche. Si vous n'utilisez que de l'eau ordinaire, sans notre mélange, pour vous rincer les voies nasales, vous ressentirez une sensation de brûlure intense, car
l'eau ordinaire n'est pas physiologique pour votre muqueuse nasale, même si c'est de l'eau potable. De plus, pour votre sécurité, n'utilisez pas d'eau du robinet pour dissoudre le mélange, à moins qu'elle n'ait été préalablement bouillie pendant au moins cinq minutes afin de la stériliser. Parmi les autres choix, notons l'eau distillée, microfiltrée (par un filtre de 0,2 micron), fournie en bouteille destinée à la vente, ou, comme nous l'avons déjà mentionné, préalablement bouillie et refroidie jusqu'à ce qu'elle soit tiède ou ait été ramenée à la température du corps. Vous pouvez conserver de l'eau bouillie dans un récipient propre pendant sept jours ou plus si vous la gardez au réfrigérateur. N'utilisez pas de l'eau non chlorée ou non ultrafiltrée (par un filtre de 0,2 micron) à moins de l'avoir préalablement bouillie et laissée refroidir jusqu'à ce qu'elle soit tiède ou ait été ramenée à la température du corps. Ne vous rincez pas les voies nasales si elles sont complètement obstruées ou si vous présentez une infection ou obstruction des oreilles. Si vous avez récemment subi une intervention chirurgicale des oreilles ou des sinus, communiquez avec votre médecin avant de procéder à la douche nasale. Si vous ressentez une pression au niveau des oreilles ou une sensation de brûlure au niveau des voies nasales, cessez la douche et consultez votre médecin pour obtenir des directives. Tenir hors de portée des enfants. Veuillez lire et conserver
